## **Network structure** (As at 01.01.2019)

HOLY AG  
Friedrich-Herrmann-Straße 6  
72555 Metzingen  
Telefon 07123 9234-902  
www.holy-ag.de

---

### **Circuit length (§27 (2) No. 1 StromNEV)**

#### **Cable length**

|                                  |         |
|----------------------------------|---------|
| Maximum voltage                  | none    |
| High voltage                     | none    |
| Medium voltage                   | 3,00 km |
| Low voltage with ouse connection | 6,5 km  |

#### **Overhead line**

|                                   |      |
|-----------------------------------|------|
| Maximum voltage                   | none |
| High voltage                      | none |
| Medium voltage                    | none |
| Low voltage with house connection | none |

### **Installec capacity of transformation levels (§27 (2) No. 2 StromNEV)**

|                                |          |
|--------------------------------|----------|
| Maximum voltage / high voltage | none     |
| high voltage / medium voltage  | none     |
| medium voltage / low voltage   | 8,19 MVA |

### **Number of extraction points (§27 (2) No. 4 StromNEV)**

|   |     |
|---|-----|
| Medium voltage                              | 3   |
| Transformation medium voltage / low voltage | 9   |
| Low voltage                                 | 320 |

### **Number of inhabitants (§ 27 (2) No. 5 StromNEV)**

|   |   |
|---|---|
| The number of inhabitants in the network of Holy AG was | 0 |
|---|---|

### **Supplied area (§27 (2) No. 6 StromNEV)**

|                       |                     |
|-----------------------|---------------------|
| The supplied area was | 0,2 km <sup>2</sup> |
|-----------------------|---------------------|

### **Geographical area of network area (§ 27 (2) No. 7 StromNEV)**

|                           |                     |
|---------------------------|---------------------|
| The geographical area was | 0,2 km <sup>2</sup> |
|---------------------------|---------------------|
